

Agriculture, Food & Natural Resources

There are thousands of challenging, educational and training opportunities within the highly skilled world of Agriculture, Food, and Natural Resources. This diverse career cluster prepares learners for careers in the planning, implementation, production, management, processing, and/or marketing of agricultural commodities and services, including food, fiber, wood products, natural resources, horticulture, and other plant and animal products. Learners need a solid background in math, science, communications, and technical skills.

Pathways include:

- **Agribusiness Systems**
- **Animal Systems**
- **Plant Systems**
- **Power, Structural & Technical Systems**

Employment opportunities will continue to increase for those who provide and market an expanding array of food, forest, and veterinary medical consumer products to a growing world population.
